

For Immediate Release: February 2025

TC7.2 Factory Team Kit

#30122

IN STOCK AND SHIPPING

ELECTRIC ▪ ON ROAD ▪ 1:10 SCALE ▪ 4 WHEEL DRIVE ▪ KIT

Team Associated is proud to announce their newest 1:10 scale 4WD electric touring car kit, the TC7.2 Factory Team Kit, the next generation in the TC7 lineage.

With current touring car platforms reaching higher plateaus of precision and performance, the engineers behind the doors of Area 51 wasted no time to ensure that the TC7 exceeds expectations. The TC7.2 comes packed with a host of new components and the features necessary to keep you on top.

As the on-road market advances at an ever-increasing rate, more is demanded from the chassis to accommodate the ultra-competitive racing classes. A successor to the TC7.1, the TC7.2 maintains the proven suspension geometry, but adds refinement to chassis balance and the flex necessary for today's racing class. The centrally positioned IFM (Inline Flex Mount) motor mount adds several mounting configurations to help fine-tune chassis flex to the racing surface, and has an integral mounting position for an optional chassis pitch control system (PCS). The TC7.2 also carries an all-new aluminum rear gear differential for the ultimate in precision and heat dissipation, as well as an ultra-light front spool assembly. Along with a list of new features, the TC7.2 Factory Team gives you everything you need to race at the highest level — all without sacrificing low part count or affordability. A well-refined racing chassis with success in its heritage, the TC7.2 Factory Team Kit is another "Champion by Design" from Team Associated!

HIGHLIGHTS

TTC7.2 FACTORY TEAM

DCV (Dual Constant Velocity) drive shaft assemblies included for front drive

Ultra-lightweight carbon composite suspension components

Ultra-lightweight front spool with replaceable hardened steel outdrives

New battery mounting system for greater adjustability

Updated floating servo mount

Updated bearing caps with integral camber link mount for ultra-fine link length adjustments

Aluminum rear CV bones

All-new, ultra-precise aluminum rear gear diff for maximum performance

FOX® Shock Bodies with Genuine Kashima® Coat, SS

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy motor, battery, ESC, servo, receiver, wheels, tires, body, and pinion gear. Assembly and painting required.

MORE FEATURES

- All-new, ultra-precise rear gear diff for maximum performance
- Ultra-lightweight front spool with replaceable hardened steel outdrives
- One-piece IFM (Inline Flex Mount) motor mount system
- Updated bearing caps with integral camber link mount for ultra-fine link length adjustments
- Updated floating servo mount
- New battery mounting system for greater adjustability
- Updated narrow chassis shape with optimized flex characteristics
- PCS (Pitch Control System) option to further adjust chassis flex characteristics
- FOX® Shock Bodies with Genuine Kashima® Coat, SS
- DCV (Dual Constant Velocity) drive shaft assemblies included for front drive
- Ultra-lightweight carbon composite suspension components
- Aluminum rear CV bones
- 26 precision ball bearings

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	360mm (14.2")
Width	fits 190mm racing class
Weight (chassis only)	508g (1.12lbs.)
Wheelbase	253.5mm-257.5mm (9.9-10.1")
Drive	4WD

ITEMS NEEDED TO COMPLETE

- 1:10 scale electric motor
- Electronic speed control
- Battery: 7.4V LiPo or 6.0V LiFe
- Battery charger (for batteries mentioned above that are used in the vehicle)
- 2-channel surface transmitter, and its batteries
- 2-channel receiver
- Steering servo
- 1:10 scale Lexan(R) 190mm car body
- Lexan® specific spray paint for body
- 1:10 scale rubber (or foam) touring car wheels and tires
- Pinion gear (48 pitch)

IDEAL CUSTOMER

For the competition-minded touring car racer
