Enduro Ecto Trail Truck RTR Enduro Ecto Trail Truck RTR LiPo Combo

#40112, 40112C

A PERFORMANCE RIG BUILT TO ENDURE. When hitting the trail, you want to do it with performance, confidence and looking good.

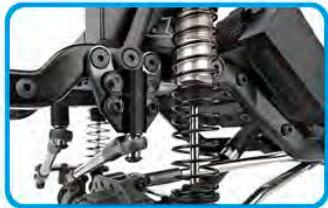

Aimed towards the serious RC rock crawler enthusiast, the new Enduro Ecto Trail Truck RTR is packed full of performance features that are sure to impress.

What makes the Enduro Ecto Trail Truck special? The Gatekeeper Suspension package (GKS™)! The GKS™ package consists of rear trailing arms that move the shocks forward, allowing a larger window for shock tuning and providing improved weight bias. The trailing arms are paired with a rear anti-roll bar for a more stable and consistent suspension when crawling on the rocks. An adjustable aluminum track bar mount firmly bolted to the chassis rail gives the Enduro Ecto more reliable and responsive steering without the flex. Our shock mount inserts with multiple mounting positions allow for precise suspension tuning, whether they're moving the shocks up, down, forward, or back.

The **#40112C LiPo Combo** includes a #27201 Reedy Compact Balance Charger and #758 Reedy 7.4V 2S LiPo Battery with T-plug.

HIGHLIGHTS

ENDURO WITH TRAILING ARM SUSPENSION 1:10 SCALE READY-TO-RUN ROCK CRAWLER ECTO TRAIL TRUCK

ALUMINUM TRACK BAR MOUNT: The GKS™ package includes an aluminum track bar mount bolted directly to the steel frame rail, making the front suspension more rigid and flex-free with a more precise steering feel.

FRONT BUMPER: Adjustable injection-molded front bumper, fairlead, and mock winch.

REEDY POWER CRAWLER MOTOR: The Reedy Power 5-slot 14-turn 550 sized brushed crawler motor provides ample torque with a smooth power delivery. This allows for slow, precise acceleration while maintaining consistent power over rough terrain and obstacles.

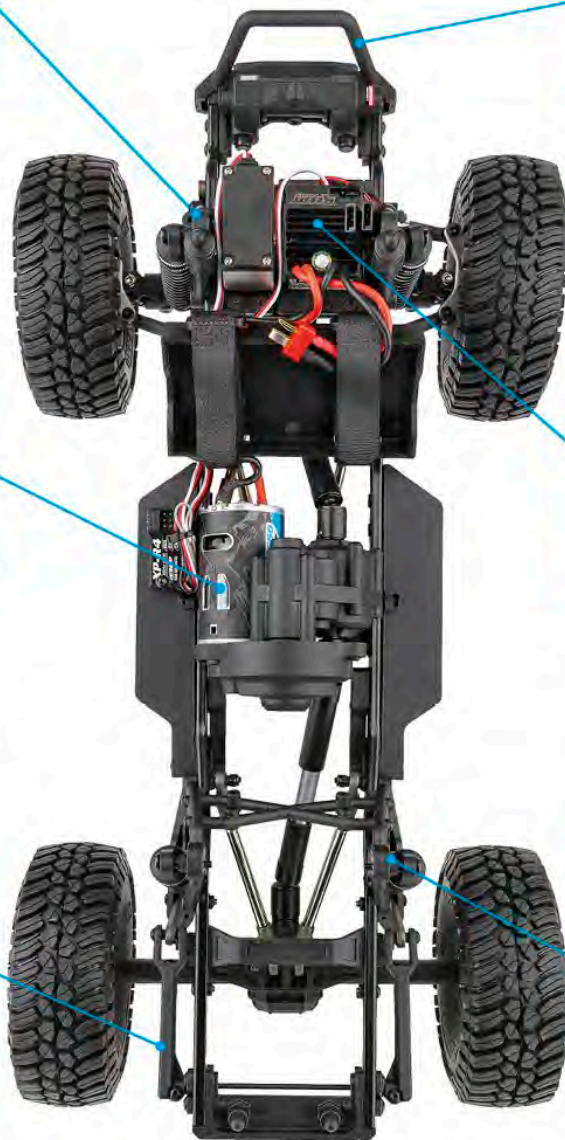

REEDY POWER ELECTRONIC SPEED CONTROLLER (ESC): The water-resistant SC480X brushed ESC is specifically programmed for crawling with proportional forward/reverse, dual auxiliary power output leads, LiPo low-voltage cutoff protections, and T-plug connector.

TRAILING ARM REAR SUSPENSION: This design moves the shocks forward, thus improving weight bias. This allows for a larger window for shock tuning and an optimized anti-roll bar mounting position.

SHOCK MOUNT INSERTS: GKS™ shock mount inserts provide drivers with the ability to tune shock angle, droop and vehicle ride height without affecting spring preload.

Due to ongoing R&D, photos may not match final kit.

MORE FEATURES

- Behind-the-axle (BTA) steering
- Aluminum steering plates
- Integrated servo winch mount
- Threaded aluminum shock bodies
- CMS (Chassis Mounted Servo)
- Universal front drive axles
- Stamped steel frame rails
- 12mm wheel hexes
- Aluminum motor plate
- Optimized ball cups for more fluid axle articulation
- Telescopic driveshafts front and rear
- Extruded aluminum driveshaft splines
- One-piece rear axle design
- Splined front axle with adjustable caster
- Machined input pinion gear
- Metal ring gear
- Machined steel top shaft
- Heavy duty 5mm diameter steel links
- Metal ball bearings included
- Steel 25T servo horn
- Adjustable front track bar

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	18.18" (462mm)
Width	9.29" (236mm)
Weight	varies
Wheelbase	12.8" (325mm)
Transmission Ratio	varies

ITEMS NEEDED TO COMPLETE

- #40112: Battery pack (#758 Reedy 7.4V 2S LiPo Battery)
- #40112: Battery charger (#27201 Reedy Compact Balance Charger)
- #40112, 40112C: 4 AA batteries for radio (#302 Reedy AA Alkaline batteries)
