Enduro, Comp Fox, Competition Rock Crawler Kit

#40129

**1:10 SCALE ■ OFF-ROAD ■ COMPETITION KIT**

Progress. You asked and you shall receive. Here at Element RC, we strive to bring you products that you want. This time, we went above and beyond to bring you a complete competition rock crawling kit, the Enduro Comp Fox.

This kit is aimed towards the serious competitive RC crawler and comes packed full of features to progress you through each gate. The lightweight flat rail carbon fiber chassis, held together with machined aluminum braces, is strong, yet light enough to help keep the center of gravity down low. With plenty of shock and link mounting positions, there are endless increments of suspension tuning options available.

Just like any good comp rig, the Comp Fox comes designed with an 8° angled Delrin® skid plate to help get over those difficult breakovers and prevent high centering.

At the center of the Comp Fox is our tried-and-true Stealth X(R) transmission with overdrive gears and forward bias aluminum motor mount. This places the weight of the motor over the front axles for the ideal targeted 60/40 weight balance.

To help maximize clearance, the Enduro Comp Fox comes with a newly designed set of high-clearance portal axles that include all-metal gears and ball bearings. With almost an inch more clearance than our standard straight axles, you know this rig means business.

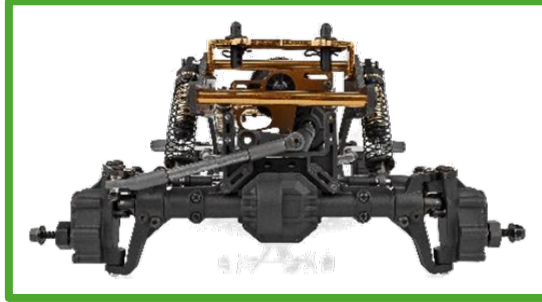

We didn't stop there. We also included some Factory Team hop-ups like steel pivot balls, high-clearance links, and threaded aluminum shocks to make the Enduro Comp Fox a fierce competitor on the rocks.

With all these features packed in one box, we know the all-new Enduro Comp Fox is the perfect rig for whatever adventures lie around the next corner. Your journey begins here!

Chassis Features:

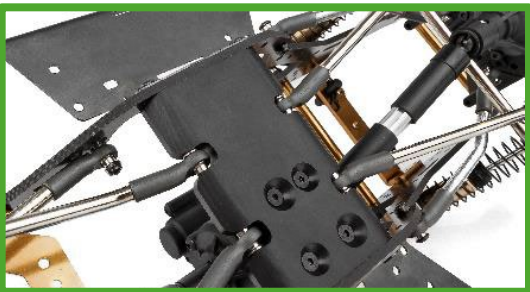

CARBON FIBER FLAT RAIL CHASSIS: together with the aluminum chassis braces, is lightweight, rigid, strong, and provides plenty of suspension tuning options.

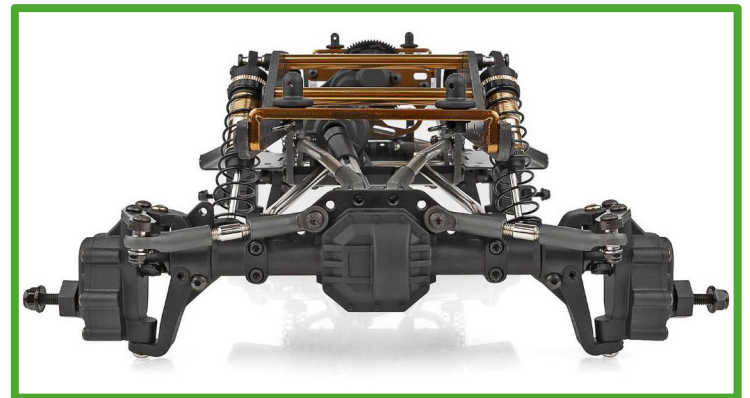

SERVO-ON-AXLE STEERING: Servo-on-axle steering provides better performance while keeping the vehicle's center of gravity low.

FORWARD BIAS MOTOR MOUNT: The two-piece aluminum motor mount flips the motor forward and low for more frontend weight bias.

DELRIN® ANGLED SKID: Machined from a solid low-friction Delrin® block, the lower skid plate is angled 7 degrees while keeping the transmission flat for more rear ground clearance and better breakover transitions.

PORTAL AXLES: When it comes to rock crawling, ground clearance is crucial. That's why the Enduro Comp Fox competition rock crawler kit includes our all-new high-clearance portal axles. With almost an inch of added center axle clearance over standard straight axles, getting over tough obstacles is a breeze.

ADDITIONAL FEATURES

- **NEW** high-clearance portal axles
- **NEW** carbon fiber flat rail chassis
- **NEW** aluminum chassis braces and body mount supports
- **NEW** Delrin® machined and flush mounted angled lower skid plate
- **NEW** 2-piece forward-bias aluminum motor plate
- Factory Team aluminum threaded shocks
- Factory Team steel pivot balls
- Factory Team 5mm heavy-duty steel
- High-clearance links
- Servo-on-axle steering
- Universal front and rear drive axles
- Aluminum steering plates
- Optimized ball cups for more fluid axle articulation
- Telescopic driveshafts front and rear
- Extruded aluminum driveshaft splines
- Machined input pinion gears
- Metal ring gears
- Machined steel top shaft
- Metal ball bearings included
- Steel 25T servo horn

SPECIFICATIONS

- **Scale:** 1:10
- **Type:** Off-Road
- **Power:** Electric
- **Length:** 410mm (16.14")
- **Width:** (without body) 230mm (9.05")
- **Wheelbase:** 322mm (12.8")
- **Weight:** (without electronics) 1.19 kg (2.63lbs)
- **Chassis:** Carbon Fiber
- **Suspension:** 4-Link Front and Rear
- **Internal Gear Ratio:** Varies
- **Axle Type:** Portal axles
- **Drivetrain:** 4WD
- **Gear Pitch:** 48 Pitch
- **Build type:** KIT
- **Shock type:** Threaded, Aluminum
- **Ball bearings:** 24 Metal Ball Bearings
- **Experience Level:** Beginner to Advanced
- **Recommended Environment:** Mother Earth
