

RC10 B64 TEAM KIT

Differential case shims included

7075 hard-anodized narrow aluminum chassis with light-weight plastic side guards

New adjustable center slipper with Low Coefficient Friction (LCF) pads

Aluminum floating motor mount allows consistent torsional chassis flex

Aluminum/carbon fiber floating servo mount offers a tweak-free assembly

5mm front wheel hexes

Easy access to diff internals. Anti-roll bars included.

Precision-made 7-degree aluminum caster blocks for added durability

RC10B64 Team Kit shown equipped with items NOT included in kit: Reedy motor, Reedy battery, Reedy ESC, Reedy servo, XP receiver and pinion gear. Body comes clear. Assembly and painting required.

NEW! RC10B64 Team Kit

RC10 B64 TEAM KIT

1:10 SCALE 4WD ELECTRIC OFF ROAD COMPETITION BUGGY KIT

It all started with a 1-2-3 sweep

In 2007, the RC10B44 swept the podium at the I.F.M.A.R. World Championships. Since then, Team Associated's first 1:10 scale 4WD buggy has held a dominant place at the front of the field. The B44 platform has gone on to win numerous National and International titles and added two more I.F.M.A.R. World Championships to its legacy in 2011 and 2013.

Speed, grip, and durability

Designed to take advantage of today's faster-than-ever tracks, the RC10B64 Team Kit offers increased durability, all new suspension geometry, a wider tuning window, improved weight distribution, and easy maintenance. Excelling on high-traction surfaces, the B64's adjustable axle height and roll centers result in a stable yet nimble platform. With a new and improved center slipper using Low Coefficient Friction (LCF) pads, the B64 rewards the driver with maximum drive out of all four wheels on artificial turf and carpet surfaces.

UPC: 784695 900141	#90014	RC10B64 Team Kit	MAP: \$429.99	MSRP: \$659.99	Available: April 2017

RC10B64 Team Kit Features

- V2 12mm Big Bore threaded aluminum shocks with 3mm TiN coated shafts and low friction X-rings for improved smoothness
- Factory Team floating aluminum motor mount and aluminum/carbon servo mounts
- Refined arm mount geometry with quick and easy tuning
- Front and rear anti-roll bars keep chassis flat for increased corner speed
- Narrow, 7075 hard-anodized aluminum chassis with centralized mass.
- Easy access center slipper clutch with LCF pads
- Strengthened front and rear suspension with hard-anodized aluminum caster blocks and carbon fiber shock towers
- 5mm front wheel aluminum drive hexes
- Team Associated clear body and screw-mounted wing by JConcepts™
- All metric hardware throughout

RC10B64 Team Kit Specifications

Scale	1:10
Power	Electric
Length	*Varies
Width	*Varies
Weight	*Varies
Wheelbase	284mm
Drive	4WD

*Final width, length and weight will vary based on electronics, tire configuration, wing position and vehicle setup.

Prototype shown. Due to ongoing R&D, photos may not match final kit. RC10B64 Team Kit shown equipped with items NOT included in kit: Reedy motor, Reedy battery, Reedy ESC, Reedy servo, XP receiver, pinion gear, wheels, tires, inserts. Body comes clear. Assembly and painting required.
