RC10SC6.2 Team Kit

#70008

ELECTRIC ■ OFF ROAD ■ 1:10 SCALE ■ 2 WHEEL DRIVE ■ KIT

Race-winning heritage. Based on Team Associated's RC10T6.2 platform, the RC10SC6.2 Team Kit represents the next step in the evolution of competitive short-course racing. The RC10SC6.2 Team Kit began life with the many great advantages already learned through the development of the RC10B6.2 and RC10T6.2. The engineers behind the doors of Team Associated's Area 51 incorporated the updates racers like you asked for and included more tuning option parts in the box.

Designed to win. The RC10SC6.2 shares key components with the RC10B6.2, RC10B6.2D, RC10T6.2, and RC10B74.1 Team Kits, making it easier than ever to run multiple classes at the same time. Like the RC10T6.2, the RC10SC6.2 has new features such as an integrated fan mount, highly adjustable rear hub assembly, and the speed, durability, and lineage expected of a true champion.

The RC10SC6.2 has been designed and built to the highest standard to give racers an edge over the competition.

HIGHLIGHTS

RC10 SC6.2 TEAM KIT

Flat suspension arms and new rear carbon fiber shock tower with updated geometry

Both Laydown and Layback Stealth transmissions included for tuning weight bias

B74.1 two-piece rear hubs with aluminum upper caps for fine geometry adjustments

Easy-access differential with height adjustment using included 0, 1, 2, and 3mm inserts

Factory Team 13g aluminum chassis weight

Updated side rails for 30mm motor fan mount shared with B6.2 buggy

+1 carbon fiber steering block arms

1.3mm front anti-roll bar and hardware included for added high-speed stability

Updated front bumper design for increased durability

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy motor, battery, ESC, servo, receiver, body, wheels, tires, fan, and pinion gear. Assembly and painting required.

MORE FEATURES

NEW Features

- B74.1 two-piece rear hubs with aluminum upper caps for fine geometry adjustments
- 1.3mm front anti-roll bar and hardware included for added high-speed stability
- Both Laydown and Layback Stealth(R) transmissions included for tuning weight bias
- Factory Team 13g aluminum ESC tray
- Updated side rails for 30mm motor fan mount shared with B6.2 series buggies
- New rear shock tower with a new inner shock mounting position
- +1 carbon fiber steering block arms
- B74 66mm rear axles with 91mm CVA bones
- 8.5mm aluminum rear clamping hexes with laser etching
- Updated front bumper design for increased durability

LEGACY Features from SC6.1

- Lightweight, hard-anodized aluminum chassis with centralized mass and three mid-motor positions for improved handling on all track types
- Layback Stealth ® transmission included for lower and more rearward CG
- Differential height adjustment with included 0, 1, 2, and 3mm inserts
- Easy access to ball differential
- New slipper assembly for better weight balance and shock clearance
- Heavy-duty 4mm carbon fiber shock towers
- Heavy-duty V2 rear axle with 91mm CVA bones
- V2 12mm Big Bore threaded aluminum shocks with 3mm shafts and X-rings for improved smoothness
- Machined pistons included for better fit and smoother operation
- Reverse bellcrank steering allows more room for mounting electronics
- Bolt-on steering block arms for easy Ackermann adjustments
- Aluminum rear ballstud mounts for added strength
- One-piece shock bushings to make assembly easier
- Lightweight aluminum top shaft
- Innovative rear arms with molded inserts for ultra-fine lower shock mounting adjustments
- Aluminum C and D arm mounts included for a large range of anti-squat and toe adjustments
- Factory Team upgraded ball bearing kit included (now oiled instead of greased for less drag)
- Heavy-duty ball cups and ballstuds allow for maximum suspension travel while reducing bind and friction

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	538mm (21.18")
Width	varies
Weight	varies
Wheelbase	325-327mm (12.80-12.87")
Transmission Ratio	2.6:1

* Actual width and weight will vary depending on the electronics and other components used in the finished kit.

ITEMS NEEDED TO COMPLETE

- 1:10 scale 540-size electric motor (Reedy Sonic line)
- 1:10 scale electronic speed control (Reedy Blackbox line #27002, 27004, 27005)
- 2-cell LiPo shorty battery pack
- Battery charger
- 2-channel surface transmitter, and its batteries
- 2-channel receiver
- Steering servo (Reedy servo #27107)
- Pinion gear (48 pitch)
- Polycarbonate-specific spray paint for body
- 1:10 scale short course 12mm hex wheels
- 1:10 scale short course tires
- CA glue for tires and wheels (#1597)
- Thread-locking compound (#1596)
