

For Immediate Release: April 2, 2018

### NEW! RC10T6.1 Team Kit

#### 1:10 Scale 2WD Off Road Electric Competition Truck Kit

**Race-winning heritage.** Based on Team Associated's RC10B6.1 platform, the RC10T6.1 Team Kit represents the next step in the evolution for competitive truck racing. The RC10T6.1 Team Kit began life with the many great advantages already learned through the development of the RC10B6.1. Armed with extensive feedback from racers like you, the engineers behind the doors of Team Associated's Area 51 set off to design the ultimate truck chassis utilizing every advantage possible.

**Designed to win.** The RC10T6.1 shares key components with the RC10B6.1 and RC10B6.1D Team Kits, making it easier than ever to run multiple classes at the same time. Like the RC10B6.1, the RC10T6.1 has new features, such as an easy-access differential with height adjustment, an all-new slipper assembly, and the speed, durability and lineage expected of a true champion.

The RC10T6.1 has been designed and built to the highest standard to give racers an edge over the competition.

*Pro-Line® Enforcer body included!*

# RC10 T6.1 TEAM KIT

Easy access to ball differential

Heavy-duty routed graphite shock towers

Differential height adjustment with included 0, 1, 2, and 3mm inserts

Heavy-duty rear axle with 91mm CVA bones

7.0mm aluminum rear clamping hex with laser etching

Layback Stealth® transmission for lower and more rearward CG

Innovative rear arm with molded inserts for ultra-fine lower shock mounting adjustments

Reverse bellcrank steering allows more room for mounting electronics

New slipper assembly for better weight balance and shock clearance

Bolt-on steering block arms for easy Ackermann adjustments

Front and rear anti-roll bar integration makes tuning easy

V2 12mm Big Bore threaded aluminum shocks with 3mm shafts and X-rings for improved smoothness

Due to ongoing R&D, photos may not match final kit. Vehicle shown on these pages equipped with items NOT included in kit: Reedy #27402 motor, #27323 battery, #27004 ESC, #27101 servo, receiver, wheels, tires, and pinion gear. Assembly and painting required.

## RC10T6.1 Team Kit Features:

- Layback Stealth® transmission included for lower and more rearward CG
- Easy access to ball differential
- Differential height adjustment with included 0, 1, 2, and 3mm inserts
- New slipper assembly for better weight balance and shock clearance
- Innovative rear arm with molded inserts for ultra-fine lower shock mounting adjustments
- Machined pistons included for better fit and smoother operation
- Aluminum C and D arm mounts included for a large range of anti-squat and toe adjustments
- Rear hubs feature large bearings and the easy-insert system to adjust camber link position and rear axle height
- Reverse bellcrank steering allows more room for mounting electronics
- Bolt-on steering block arms for easy Ackermann adjustments
- Precision-ground steering bellcrank screws to reduce steering slop
- Aluminum rear ballstud mount for added strength
- 7.0mm aluminum rear clamping hex with laser etching
- Heavy-duty ball cups and ballstuds allow for maximum suspension travel while reducing binding and friction
- Pro-Line® Enforcer body included
- Front and rear anti-roll bar integration makes tuning easy
- Heavy-duty routed graphite shock towers
- Heavy-duty rear axle with 91mm CVA bones
- Lightweight, hard-anodized aluminum chassis with centralized mass for improved handling on all track types
- V2 12mm "Big Bore" threaded aluminum shocks with 3mm shafts and X-rings for improved smoothness
- One-piece shock bushing to make assembly easier
- Lightweight aluminum top shaft
- Factory Team upgraded ball bearing kit included (now oiled instead of greased for less drag)

## RC10T6.1 Team Kit Specifications

<b>Scale</b>	1:10
<b>Power</b>	Electric
<b>Length</b>	368mm (14.49")
<b>Width</b>	Varies*
<b>Weight</b>	Varies*
<b>Wheelbase</b>	288-290mm (11.34-11.42")
<b>Drive</b>	2WD

*\*This vehicle comes as a kit and must be fully assembled by the user. Final width and weight will vary with the actual electronics and tires used to complete the T6.1 Team Kit.*
