

For Immediate Release: February 2025

#6042 RC10 2025 Metallic Edition Kit

ELECTRIC ▪ OFF ROAD ▪ 1:10 SCALE ▪ 2 WHEEL DRIVE ▪ KIT

RACE THE CAR THAT CHANGED RC OFF-ROAD RACING FOREVER!

On December 5th, 1984 the All-American designed Team Associated RC10 was introduced to the RC world. Being the first to take home the gold in both the ROAR National and IFMAR 2WD World Championships, the RC10 secured its place as a legend in RC car history. This year (2025) marks the 41st anniversary of the RC10 and we are proud to offer this special limited **2025 Metallic Edition kit**.

Staying true to the original, this anniversary kit features the same race car technology introduced in the 80s. It's that innovation that has kept Team Associated on top of the RC car racing world for the past 41 years.

In 1985, Jay Halsey took home the win at the very first 2WD IFMAR Off-Road World Championship in Del Mar, California. Since then, there have been many National and World Champions. In fact, every iteration of the RC10 platform has won at least one IFMAR World Champion title.

Photo bottom: Many of the people involved in the design of the RC10 were testing and driving the cars, even Mike Reedy, Roger Curtis, Curtis Husting, and Gene Husting.

This is a limited-edition vehicle

THE TEAM DOES IT IN THE DIRT

A RACE CAR, NOT A TOY.

Sure, you've heard that before. But Team Associated designs and engineers model RACE cars.

The new RC10 2025 Metallic features fully adjustable four-wheel independent suspension, an aluminum alloy monocoque tub and race-proven hardware throughout. Strength and durability are standard equipment.

RACE-WINNING ENGINEERING

For maximum traction, the RC10 suspension is damped by long throw, fluid-filled racing shocks, using machined alloy cylinders and drill blank shafts for silky smooth action.

Simulated gold plating on competition modular wheels

True gold anodized factory chassis etched with iconic AE logo and Team Associated Race font!

RC10 2025 Metallic Edition Kit

RACE-WINNING DESIGN AND PERFORMANCE

The RC10 started as the vision of Team Associated's founder Roger Curtis (RC) and became one of the most iconic RC cars in history.

In celebration of the 41st anniversary of the original RC10, we are proud to bring to you the RC10 2025 Metallic Edition kit, a faithful reproduction of Roger's world championship-winning design that changed the world of RC off road racing forever.

The design and construction of the RC10 is totally unique to electric off-road cars, featuring a rigid alloy monocoque tub with fully adjustable suspension. Included are Associated's custom coil-over aluminum racing shocks, VariLok differential and modular 3-piece clamping wheels.

Engineered for easy assembly and maintenance, the RC10 is also easy to drive over all kinds of terrain. The rugged nylon suspension and alloy tub are tough enough to handle bumps and crashes of beginners as well as intense wheel-to-wheel action.

So buckle up and go off-road racing with the Team. The Associated RC10 2025 Metallic Edition is ready to take on the competition.

Full race rear suspension includes durable dog bone and stub axle drivetrain with pinned modular wheels. Quick release knockoff design provides fast, accurate alignment. Low profile gearbox uses VariLok adjustable diff and is protected by an integrated motor/heat sink.

Independent suspension with coil-over shocks help smooth out the bumps. Precision molded nylon suspension components can be easily custom color dyed. A-Arm/Ball joint design permits static camber, camber rise, caster, ride height and spring rate tuning to suit every type of track.

ITEMS NEEDED TO COMPLETE

- 6-cell NiMH or 2S LiPo for radio-controlled car
- Radio control battery charger
- 1:10 scale radio control electronic speed control
- 1:10 scale 540-size electric RC car motor
- 2-channel RC surface transmitter and its batteries
- 2-channel receiver
- Pinion gear

SPECIFICATIONS

Scale	1:10
Power	Electric
Length	381mm (15")
Width	226.8mm (8.93")
Weight	Varies
Wheelbase	267.7mm (10.54")
Transmission Ratio	1.83:1
