TEAM ASSOCIATED

⚡ Introduction

Thank you for purchasing this Team Associated product. This assembly manual contains instructions and tips for building and maintaining your new vehicle. Please take a moment to read through the manual and familiarize yourself with the steps. We are continually changing and improving our designs; therefore, actual parts may appear slightly different than the illustrations. New parts will be noted on supplementary sheets located in the appropriate parts bags.

Check each bag for these sheets before you start to build.

Check www.rc10.com for the latest versions of our instruction manuals.

⚡ TC28 Features

- Steel chassis plate for low center of gravity
- Independent suspension front and rear
- Mid-motor configuration with equal length belts (front and rear)
- Fluid filled gear differentials front and rear with height and belt tension adjustment
- Anti-roll bar system for front and rear suspension
- Silicone grease lubricated shocks
- Constant velocity driveshafts
- RadBody Mako X2 included
- Compatible with all Reedy Electronics for 28th scale
- White wheels included that fit optional front wheel flanges to tune steering feel
- Universal front bumper included

⚡ Additional

Your new TC28 Kit comes unassembled and requires the following items for completion (refer to AssociatedElectrics.com for suggestions):

- R/C two channel surface frequency radio system
- AA-size batteries for transmitter
- Electronic Speed Control ("ESC")
- Steering servo
- R/C electric motor
- Battery charger (a peak detection charger, or LiPo compatible charger)
- 2 cell LiPo battery pack
- Polycarbonate specific spray paint
- Cyanoacrylate glue ("CA") (#1697)
- Thread locking compound (#1596)
- Pinion gear, size determined by type/turn or kV of motor

⚡ Other Helpful Items

- Silicone Shock Fluid (Refer to AssociatedElectrics.com for complete listings)
- 4.5mm Nut Wrench
- FT Body Scissors (#1737)
- Calipers or a Precision Ruler
- .050", 0.9mm, 1.3mm, 1.5mm Hex Wrenches
- FT Body Reamer (#1499)
- Soldering Iron
- FT 28th Scale Camber Tool (#21481)
- Small Needle Nose Pliers
- Hobby Knife

Notes

This symbol indicates a special note or instruction in the manual.

This symbol indicates the number of the same part that is required.

This symbol indicates the order within a step to assemble parts.

This symbol indicates there are optional FT parts available

This symbol indicates a Racers Tip.

This symbol indicates where Thread Lock Adhesive should be applied. *not included

This symbol indicates where Diff Fluid should be applied.

This symbol indicates where Shock Fluid should be applied.

This symbol indicates where FT Silicone Grease should be applied. *not included

This symbol indicates where FT Diff Lube should be applied. *not included

This symbol indicates where Black Grease should be applied.

This symbol indicates where Green Slime can be applied. *not included

There is a 1:1 hardware foldout page in the front of the manual. To check the size of a part, line up your hardware with the correct drawing until you find the exact size. Each part in the foldout has a number assigned to it for ordering replacement parts.

REAR

:: Bag Tires / Wheels - Step 1

21478
TC28 Tire Set, Front (OD 25mm)

21478
TC28 Tire Set, Rear

21466
TC28 Wheel Set, White

OPTIONAL 21467
TC28 Wheel Set, Yellow

21466
TC28 Wheel Set, White

21689 x4
M2 Locknut, Aluminum

Note:
Do not over-tighten wheel nuts.
Use CA glue or tire tape to mount tires to wheels.

:: Body - 1

Body Mounting:
1. Use the existing front hole dimples.

21695
Radboddy Mako X, Clear Body

2. Mark rear body post holes – 2.5mm further forward (from center) than existing rearward most dimples.

:: Body - 2

3. Cut off excess polycarbonate along bottom edge of body. Check that your marks line up with body posts before reaming holes.

Paint mask and body decals included.
Trim wheel wells to clear wheel and tires as needed.

Wing Mounting:

1. Cut out the wing along the outer lines. Trim wing down as desired for tuning.
2. Mount the wing by reaming existing dimples (front set of dimples suggested).

3. Use reamed holes on the wing as a guide for reaming mounting holes on the body. Take care to center the wing side to side and keep it square.
4. Use included mounting hardware.

*Note that both the wing and body have overspray masking which should be removed before final assembly and adding decals.
