

For Immediate Release: February 27, 2015

NEW! **FACTORY Team** Premium Silicone Diff Fluid expanded viscosity range now available

The line of Factory Team Silicone Diff Fluids has been expanded and now offers even more viscosities to choose from, helping you dial in the optimum performance for your racing application. Additional weights are: 4000, 6000, 15,000, 80,000, 200,000, 500,000, and 1,000,000cSt, and will serve to complement the already extensive line.

Factory Team Silicone Shock and Diff Fluids are made of the highest quality materials and are laboratory-tested, resulting in a high-performance blend of premium silicone that provides more consistent differential action as well as longevity.

- New flip-top cap
- Sticker on lid to quickly find the fluid you are looking for
- These new fluids allow for finer tuning, providing more options than before
- Factory Team Silicone Fluids are made in the USA exclusively for Team Associated by Lucas Oil Products, Inc. for consistent viscosity
