

For Immediate Release: March 21, 2016

## NEW! **FACTORY Team** Aluminum Servo Horns

#1361 FT Aluminum Servo Horn  
23T, 18.5mm

#1363 FT Aluminum Servo Horn  
25T, 18.5mm

Designed for the steering servo in the RC8B3, RC8B3e, RC8T3, and RC8T3e. These new machined aluminum servo horns are stronger than the stock plastic ones that come with most servos and due to the slightly shorter length, they provide a smoother steering feel while decreasing the load on the servo.

### Features

- 7075 T6 aluminum
- Clamping style with large m2.5 screw
- Length 18.5mm for smoother steering response and less stress on the servo
- Laser etched spline size

### Fits

- 23T fits Airtronics, JR, KO, and Spektrum servos
- 25T fits XP Digital, Reedy, Futaba, Savox, and newer-style Hitec servos
