

For Immediate Release: June 16, 2016

New! Optional Tall Rear Shock Tower for the RC10B6 & B6D

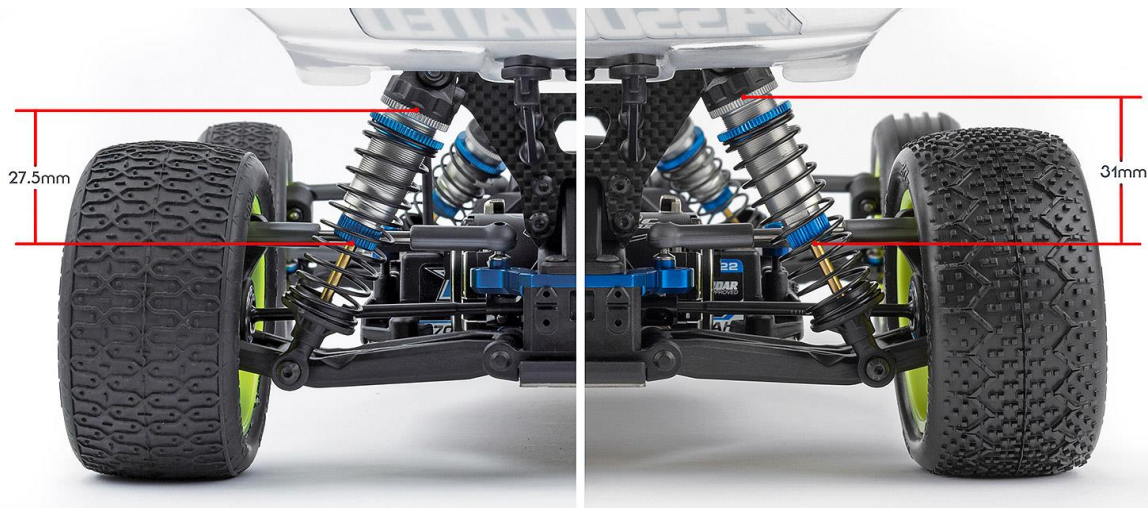

#91666 B6 Rear Shock Tower (Long)

Arrow shows hole added to distinguish this optional tower from the standard tower

The optional, tall rear shock tower allows your RC10B6 and RC10B6D to accommodate longer, higher-capacity 31mm shocks (the same shocks that come on the B5 series) for better compliance on very bumpy or loose tracks.

#91666	B6 Rear Shock Tower (Long)	\$19.99	Available July 2016
--------	----------------------------	---------	---------------------

For comparison: Left: standard #91665 shock tower. Right: optional #91666 shock tower.
