

For Immediate Release: July 7, 2016

NEW! B6 Laydown Transmission Conversion

The new B6 Laydown Transmission Conversion comes with everything you need to convert your B6D from a standup configuration to laydown.

"Laying down" the transmission lowers the vehicle's overall center of gravity and reduces the polar moment, allowing for increased corner speed in higher-grip conditions.

Left: Standup. Right: Laydown.

#91705 B6 Laydown Transmission Conversion
