New! Reedy Zappers SG4 Competition HV-LiPo Batteries

New for 2021, Reedy Zappers SG4 HV-LiPo 2S batteries are in stock and ready to ship! Zappers SG4 batteries incorporate state-of-the-art LiPo chemistry with advancements in construction that result in incremental improvements in power output and internal resistance with huge gains in durability. Reedy strives to improve all aspects of battery performance in the increasingly competitive world of RC car racing.

Zappers SG4 batteries feature a 3.8V/cell nominal voltage, meaning that the battery can be safely charged to 4.35V/cell. It is not a secret that more voltage equals more power, so there is no easier way to increase power and top speed than a higher charge voltage! Even when the typical 8.40V (4.2V/cell) charging limit is enforced, Zappers SG4 shine thanks to their inherently flat discharge curve, which results in higher voltage deeper into the race.

Zappers SG4 batteries are available in several configurations, including all-new 2S Slim Stick and 4S Shorty models, for a variety of on-road and off-road applications. A high quality, durable hard case helps prevent damage while embedded socket connectors keep power-robbing resistance to a minimum. Male ESC connectors are included.

LiPo battery technology continues to evolve and Reedy is committed to bringing improved performance to the masses.

Features

- State-of-the-art LiPo chemistry
- Heavy-duty internal construction
- Reduced IR with elevated average voltage
- Improved reliability and cycle-life
- Durable hard case with low-resistance connectors
- Built to ROAR/EFRA/BRCA/IFMAR specifications

A mobile version of the specs are available on **A-Team Apps** under "Reedy Power" here: <http://bit.ly/ateamapps>
