

For Immediate Release: January 26, 2022

New! Reedy 2513MG Digital Metal Gear Servo

Reedy's all-new 2513MG Digital Metal Gear Servo is a quality upgrade for RTR vehicles, with speed and torque ratings that improve driving precision by giving drivers a better "feel" for their vehicle.

The all-metal gear set is designed for strength and durability, while a CNC-machined center case reduces operating temperatures for fade-free operation. Dual ball bearings, a high-impact plastic top case, and water-resistant construction further improve reliability and value.

Features

- Reliable high-torque motor
- CNC machined center case
- High-impact case material
- Precision metal gears
- Dual ball bearings
- Water-resistant

Specifications

Feature	Specification
