

For Immediate Release: January 4, 2019

## New! Reedy HV Digital Competition Crawler Servo

Reedy's HV Digital Competition Crawler Servos are trail-tested and engineered for use in competition-level trail trucks and crawlers. Powerful motors create incredible torque without sacrificing speed, while an advanced microprocessor provides precision steering control.

An all-metal gear set is designed for strength and durability while an integrated aluminum mid-case reduces operating temperatures for fade-free operation. The soft-centering function centers the servo slowly on power-up for scale appearance and steering system damage prevention. High voltage compatibility allows users to take advantage of external BEC units.

Thanks to its impressive list of features, Reedy's HV Digital Competition Crawler Servo is the logical choice for crawler and trail truck enthusiasts of all skill levels.

### Features

- Water and dust resistant
- Soft-centering function
- Aluminum heat sink case
- Powerful coreless motor
- Ultra-precise metal gears
- Dual ball bearings
- High voltage compatible

### Specifications

		<b>RC2312</b>
Part #		27116
Input (V)		6.0V - 7.4V
Speed (sec/60°)	6.0V	0.15
	7.4V	0.12
Torque (kg-cm)	6.0V	19.3
	7.4V	23.2
Dimensions		39.5 x 20.0 x 38.6
Weight (g)		63.5
Spline		25
