

For Immediate Release: February 24, 2021

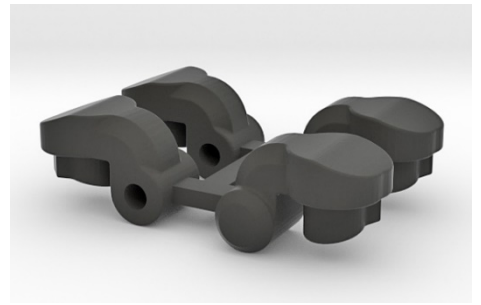

## NEW! Angled Fan Mount for the RC10B6.2

*Angled Fan Mount mounted to the B6.2*

*Angled Fan Mount unmounted*

*Angled Fan Mount in Shapeways store (fan not included)*

Improve airflow to your motor with the NEW Angled Fan Mount for your Team Associated vehicles. This fan mount utilizes the stock mounting location but moves the fan behind the slipper spring assembly. This has been a popular spot for racers to tape their fans and has been proven to improve cooling performance.

Found on our [Area 51 Design Works Shapeways Store](#), these fan mounts come in a group of four (4) and are 3D printed out of durable Nylon12 using SLS (Selective Laser Sintering) technology. Multiple color options are available!

**BUY NOW!**

**DOWNLOAD**

Free downloadable .STL file also available for those who have access to their own printer.

- Angled Fan Mount fits: RC10B6.2, RC10B6.2D
- Improved airflow to the motor resulting in lower motor temp and less fade (requires a larger opening to be cut into the back of the body)
- Mounts to siderail in stock location using the kit hardware. No more tape!
- Multiple color options available through Shapeways
