New! Factory Team Carbon Laydown Gearbox and Chassis Braces

(Pictured: #91952 RC10B6.1 FT Laydown Gearbox and Chassis Braces, carbon.)

The carbon material offered by Factory Team has become a popular upgrade for many parts across the Team Associated line of race cars. Adding rigidity to suspension components and limiting chassis flex is a great tuning option for race cars. The carbon laydown gearbox and chassis braces reduce the flex in the rear of the chassis, resulting in a more consistent and precise feel on track. This set is a direct replacement for #91791 and #91709.

Fits the RC10B6.1, RC10B6.1D, RC10B6.2, RC10B6.2D, RC10B6.3, RC10B6.3D, RC10B6.4, RC10B6.4D, RC10T6.1, RC10T6.2, RC10SC6.1, RC10SC6.2
