

For Immediate Release: Immediate

NEW! RC8T4 40/9 Gear Set

(Pictured: 81625 bag contents, ring and pinion gear, 1 each)

The new upgraded 40/9 ring and pinion are completely re-designed with massive teeth which allow for more tooth engagement and prevent skipping. These new gears must be installed front and rear as a set. Fits any RC8T4 or RC8T4e as well as older version counterparts (RC8T3.2 and T3.2e)

Team Associated driver Spencer Rivkin used the new parts to win the 2024 ROAR Electric Truck National Title with his RC8T4e, never having to worry about the durability of his truck gearboxes while he pushed it to the max on track.

RC8T4 40/9 Gear Set:

1. Includes 40T diff ring gear and 9T pinion gear
2. Fits RC8T4 and RC8T4e and older version counterparts (RC8T3.2 and T3.2e)
3. Needs 2 pcs #81625 per vehicle
