## New! Reedy Zappers SG5 Competition HV-LiPo Batteries

Reedy's Zappers SG5 HV-LiPo batteries feature leading edge LiPo chemistry with advancements in cell manufacturing and battery construction that result in improvements in capacity, power output, internal resistance, and durability. Reedy strives to improve all aspects of battery performance in the increasingly competitive world of RC car racing.

Zappers SG5 HV-LiPo batteries feature a 3.8V/cell nominal voltage, which means that the battery can be safely charged to 4.35V/cell. It is not a secret that more voltage equals more power, so there is no easier way to increase power and top speed than a higher charge voltage! Even when the typical 8.40-8.44V (4.2-4.22V/cell) charging limit is enforced, Zappers SG5 batteries shine thanks to their inherently flat discharge curve, which results in higher voltage deeper into the race.

Zappers SG5 batteries are available in twelve configurations for a variety of on-road and off-road applications. A high quality, durable hard case helps prevent damage, while embedded socket connectors keep power-robbing resistance to a minimum. Male ESC connectors are included!

LiPo battery technology continues to evolve and Reedy is committed to bringing improved performance to the masses.

### Features

- Leading edge LiPo chemistry
- Heavy-duty internal construction
- High capacity
- Reduced IR with elevated average voltage
- Improved reliability and cycle-life
- Durable hard case with low-resistance connectors
- Built to ROAR/EFRA/BRCA/IFMAR specifications

#27383 Zappers SG5 4800mAh
