

For Immediate Release: June 19, 2023

## New! Enduro Stealth XF Transmission Set

The Stealth® XF symbolizes the continued progression of the Element RC brand. We took many of the notes and design features we learned from the Stealth X and refined them into a forward-motor setup.

**The new design moves the motor forward to help keep the weight over the front wheels while maintaining a lower center of gravity.** This upgraded pre-assembled transmission comes equipped with new 18% overdrive gears, Factory Team Slipper lockout, and ball bearings for ultra-smooth operation.

The Stealth XF Transmission Set comes pre-assembled and greased from the factory and includes:

- #42333 Enduro SE FT Stealth XF Slipper Lockout
- #91563 FT Bearings, 10x15x4mm
- Plastic Stealth XF upper case gears
- #42338 Stealth XF 18% Overdrive gears (55T/25T)
- New #42339 Stealth XF Overdrive Outdrives
- #41090 LP SHCS motor screws

Fits all 1:10 Enduro vehicles.
