

For Immediate Release: April 29, 2021

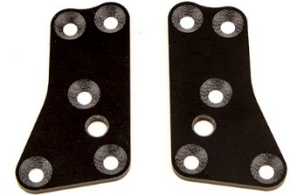

New! RC8B3.2 FT Suspension Arm Inserts, G10, 2.0mm

#81437 RC8B3.2 FT Suspension Arm Insert, G10, Rear, 2.0 mm

#81441 RC8B3.2 FT Suspension Arm Insert, G10, Front Lower, 2.0 mm

#81445 RC8B3.2 FT Suspension Arm Insert, G10, Front Upper, 2.0 mm

G10 fiberglass is a great upgrade to increase arm stiffness and durability over the stock plastic suspension arm inserts! While G10 is a more flexible material than carbon fiber, these inserts are thicker than the current carbon fiber inserts (1.2mm vs. 2.0mm), so these inserts are stiffer than the current carbon fiber parts. Perfect for the upcoming heat of outdoor season!

Each set contains two inserts – one left and one right.

Fits: RC8B3.2, and RC8B3.2e suspension arms (#81434, #81438, #81442).
