

For Immediate Release: May 21, 2020

NEW!  **M4 Low Profile Wheel Nuts**

The Factory Team M4 Low Profile Wheel Nut is designed to fit on the front of car models (example: B74, B64, TLR 22, TLR 22-4, Tekno EB410, Yokomo YZ-4 SF) that require a thin nut to maintain the legal width limit at major events. With large diameter locking serrations, these wheel nuts “bite” into the face of the wheel to create a secure hold.
