## NEW! Reedy Steel Under-Battery Weight Sets

Reedy's LiPo Under-Battery Weight Sets are now available for both shorty and stick configurations! These weights are the ideal solution for meeting minimum weight requirements, equalizing left/right weight distribution, and/or lower the vehicle's center of gravity for improved handling.

Each set is precision cut from steel with the weight value laser etched onto each piece along with the world-famous Reedy logo. Each set contains three weight options, which can be used individually or combined to achieve the desired result.

Visit [www.reedypower.com](http://www.reedypower.com) for a complete list of Reedy motors, batteries, electronic speed controls, servos, and accessories.

### Features
