

For Immediate Release: June 26, 2023

New! More Servo Wire Extension Lengths

Servo and receiver too far apart? Too difficult to route the servo wiring? Servo wiring extensions to the rescue! Reedy Power added four more extension lengths to make it easier to route your wiring where you want it. Lengths of 50mm (1.97"), 75mm (2.95"), 125mm (4.92"), and 175mm (6.89") give you plenty more choices to get the job done.
