

For Immediate Release: June 16, 2020

## New Parts for the RC10B74

**#92262 Differential Outdrives** are an updated version of the original #92136 RC10B74 front or rear outdrives. They feature less machining work to provide a more durable and economical outdrive. Their length is 1mm shorter than the original outdrives to reduce chipping around the edges.

Fits: Team Associated RC10B74

**#92272 RC10B74 Steering Block Arms** are a new and stronger design for the RC10B74 buggy. Keeping the original steering geometry, the 2.5mm carbon fiber parts have a larger cross section and radii that greatly improves durability. The steering stop area has been modified to allow for the popular racer modification of grinding the plastic steering stop for additional throw on tight tracks.

Fits: Team Associated RC10B74
