New! RC10B74 Factory Team Carbon Fiber Chassis Braces

Team Associated introduced a new Factory Team line of carbon fiber composite option parts for several vehicles. Impregnated with rigid and light carbon fibers inside the injection molded material, these Factory Team parts are the ultimate in high performance.

New for the RC10B74, RC10B74.1 and RC10B74.1D are these chassis braces in the same new material.

- **Lightweight** - Approximately 12% weight savings over “hard” material.
- **Extreme Rigidity** - More predictable handling in high traction applications and increased vehicle stability in fast corners.
- **Improved Durability** – Significantly improved strength over “hard” option parts.
