

For Immediate Release: July 8, 2022

New! 1:10 Off-Road Buggy Wing, 7"

Team Associated introduces a new 7" pre-cut wing for 1:10 scale off-road buggies. The new, higher downforce 7" wing adds additional high-speed stability over the currently available 6.5" wing for when track layouts and conditions call for it. In general, more downforce will be desired on tracks that have high grip or a lot of high-speed and sweeping corners.

Sold as one clear, pre-cut wing per package. Wing mount dimples are not drilled.
