

For Immediate Release: Sept. 28, 2020

NEW!  **RC8B3 FT 4-shoe Steel Flywheel**

The new optional #81463 RC8B3 FT 4-shoe steel flywheel is a direct replacement for the standard #81370 RC8B3 aluminum 4-shoe flywheel. The steel flywheel is heavier than the aluminum flywheel and increases the overall rotating mass of the clutch assembly. This offers a more stable engine idle and a smoother bottom end throttle feel.

New: #81463 RC8B3 FT 4-shoe Steel Flywheel = ~36 grams

Standard: #81370 RC8B3.1 4-shoe Aluminum flywheel = ~12 grams

Fits all RC8B3 and RC8T3 series vehicles and .21 off-road nitro engines.
