For Immediate Release: October 12, 2017

NEW! **FACTORY Team** Clutch Gauge, 4-shoe

Worn-out clutch shoes can negatively impact the performance of the clutch and cause an engine to intermittently flame out even when tuned properly. This decreases a vehicle's overall performance and can cause headaches at the track.

Measure the life your clutch shoes with this Factory Team "Go or No Go" style gauge from Team Associated. When the tool is placed over the clutch shoes and rotated in the direction of the arrows, the smallest internal measurement profile of the gauge, 23.40mm, determines if the shoes are too worn – with new shoes, it will turn only slightly (left photo); with worn shoes it will turn more (right photo). If the shoes are smaller than the tool, replace the shoes for optimal performance. The tool works with a complete clutch assembly either installed or uninstalled on an engine. This eliminates the need for expensive measuring devices such as calipers or micrometers. Checking the health of your clutch has never been easier!

Features:

- "Go or No Go" style gauge indicates life of clutch shoes
- Laser-etched measurement range and arrows
- Factory Team styling
- Made from hard-anodized aluminum
- Works on Team Associated 4-shoe clutch (stock B3.1 #81370) and Team Losi 4-shoe style clutches (steel and aluminum).

UPC: 784695 015555	#1555	FT Clutch Gauge, 4 shoe	MSRP: \$17.99	BUY NOW!
