

New Product. For Immediate Release: October 27, 2009

Reedy AA Alkaline and AA 2700mAh NiMH Batteries

Reedy LiPo and sub-C batteries are well known for their championship performance and are respected worldwide. This same performance is now available in AA NiMH and Alkaline versions!

Reedy's 2700mAh NiMH AA batteries feature high capacity and power output for your favorite R/C model, transmitter, or receiver. They also offer excellent performance in digital cameras, portable electronics, emergency lights, or any devices that benefit from extended battery life and/or maximum power output.

For those on a budget or who do not want to bother with charging, Reedy alkaline batteries are the perfect alternative. Transmitters, R/C cars, and other electronic devices benefit from their long-lasting high-power performance.
